Work Experience

SDE Intern | Refold AI | (AI-powered workflow automation platform, 60M+ API calls/month) Feb 2026 – Aug 2026

- Architected **10+ enterprise-grade integrations** (Snowflake, ServiceNow, HubSpot, Salesforce, and others) for an **enterprise automation workflow platform**, implementing **OAuth 2.0/API key authentication** and **webhook-based event handling**, and authored **OpenAPI specifications** adopted across the integration ecosystem.
- Improved reliability of a **BullMQ-based fault-tolerant** job execution system across **6 microservices** by resolving retry logic issues, dead-letter queue misconfigurations, and race conditions; this reduced **job failure rates by 40%**.
- Engineered a Claude-powered migration tool to automate transformation logic conversion across 214+ third-party integrations; successfully migrated 100 connectors, **reducing implementation effort by 90%**.
- Reduced action discovery latency by **30%** across **200+ connectors** by implementing lazy loading, pagination, and Redis-backed **OAuth 2.0** token-aware **response caching**, profiled and validated using **Prometheus metrics** and logs.

Full Stack Developer Intern | Crystaltech Services Feb 2025 – Sep 2025

- Pioneered **responsive full-stack features** using the **MERN stack**, improving core user flows and contributing to a **15% increase in user engagement**.
- Delivered 10 high-performance REST APIs supporting **authentication, authorization**, and real-time data pipelines, applying MongoDB query optimization to **cut average response latency from 250ms to 150ms by 40%**.
- Collaborated in **Agile/Scrum** team employing **Git**, conducted **40+ code reviews** identifying 60+ issues pre-production.

Education

Indian Institute of Information Technology, Bhopal CGPA: 7.78/10.0
Bachelor of Technology in Computer Science and Engineering Nov 2022 – May 2026
JEE Main 2022: 98.01 percentile (AIR 17,979) | Top 2% among 1,000,000+ candidates

Projects

EchoRoom: Horizontally Scaled Full-Stack Real-Time Messaging System with RAG Assistant Live | GitHub
Node.js, Python, React, RAG, TypeScript, Socket.io, Redis Pub/Sub, Docker, MongoDB, Prometheus, Grafana

- Engineered a distributed messaging platform leveraging Redis Pub/Sub to synchronize real-time events across horizontally scaled nodes, supporting **1,000+ concurrent users** while maintaining **sub-100ms P95 latency** and resolving the siloed socket problem.
- Built a **responsive React.js frontend** with **Zustand** for centralized state management, supporting **1,000+ WebSocket connections** and real-time message synchronization across **4+ distributed nodes**.
- Developed a **RAG-based** AI assistant enabling 1,000+ concurrent users to query conversation history in natural language, leveraging vector embeddings and semantic retrieval for context-aware responses.

OneCart: Event-Driven Full-Stack System with RabbitMQ & Payments Demo | GitHub
AWS EC2, RabbitMQ, Docker Compose, Node.js, Express.js, Razorpay, NGINX, React.js, Jest (testing)

- Modeled and deployed an end-to-end **MERN e-commerce platform**, implementing responsive **React.js product browsing and checkout flows** and routing API traffic through **NGINX on AWS EC2**.
- Introduced **RabbitMQ-based** asynchronous email delivery pipeline for order confirmations with failure handling and retries, cutting checkout **response time by 35% under load**.
- Integrated secure Razorpay payment workflows, handling order creation, verification, and failures across **1,000+** payments.

Technical Skills

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL
Frontend: HTML5, CSS3, React.js, Next.js, Zustand, Redux, Bootstrap, Tailwind CSS, Shadcn/ui
Backend: Node.js, Express.js, RESTful APIs, WebSockets, Authentication (JWT, OAuth 2.0)
Databases: MongoDB, PostgreSQL, Redis (Pub/Sub, Caching)
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Docker Compose, NGINX, Prometheus, Grafana
Messaging & Async & AI/ML: RabbitMQ, BullMQ, RAG, Vector Embeddings, Semantic Search
Concepts: Data Structures & Algorithms, Asynchronous Processing, Horizontal Scaling, REST API Design, Agile/Scrum
Testing & System Design: Jest, API design, caching strategies, rate limiting, system design, State Management

Achievements

- Selected among the Top 5 teams out of 200+ participants in a college-wide hackathon at IIIT Bhopal for developing a scalable AI-assisted workflow automation platform.
- **3-star (1644)** CodeChef competitive programmer with **800+ DSA problems** solved across LeetCode and CodeChef.
- **Open Source Contributor**: Built an emoji picker with debounced search, used by 1,000+ daily active users.
